

Agenda week 5

Things to talk about

1. State of the server: Is the server running correctly? Is it able to do every that is needed?
2. How to implement a friends list using the server.
3. GUI second screen: Discussing the current state and what features it should contain eventually.
4. Combining a database with our project: Discuss the 'hows' and 'whats' of the implementation.
5. Thinking about how to implement (one of) the 8 features we finally need to have in the project.
6. Other issues still open on GitLab.

To-do's and until next meeting

1. Possibly combining the server with the GUI.
2. Adding functions to the second screen of the GUI.
3. Making the first screen *beautiful* (using JavaFX).
4. Starting the implementation of (one of) the features.

Deliverables / goals

1. Getting the server to work fine
2. Having a concrete plan for the rest of the GUI.
3. Finding a way to combine a database.

Responsibilities

Everybody will be responsible for one or multiple subjects. This will be further discussed at the meeting.
